- Pull-down bar suitable for all manually operated wall / ceiling projection screens
- Length: 125 cm

- Brackets (100 cm) can be shortened as required

■ Remote controls

● Technical information

Remote controls

To operate the projection screen from a distance, a remote control is a practical and simple solution. The remote control comprises a control module, a remote switch and a handheld transmitter. The remote control can be installed without any extra wiring and also is perfectly suitable for pre-existing projection screens.

After quick and easy programming, the high-frequency remote control switch and handheld transmitter can be used within a range of 30 metres of the screen.

Cordless high-frequency remote control
ref. 5555 00

After quick and easy programming, the infrared remote control switch and handheld transmitter can be used within a range of 7 metres of the screen.

Cordless infrared remote control
ref. 5540 00
